Reviews

A whole new eBook with a brand new point of view. It is definitely simplistic but shocks in the 50 percent of the publication. I am just pleased to explain how this is the greatest ebook i have read during my very own daily life and could be he best ebook for possibly.

Springer. Paperback. Book Condition: New. Paperback. 181 pages. Dimensions: 9.2in. x 6.0in. x 0.5in. This Lecture Notes in Computer Science (LNCS) volume contains the papers presented at the Third International Workshop on Computational Forensics (IWCF 2009), held August 13-14, 2009 at The Netherlands Forensic Institute in The Hague, The Netherlands. Computational forensics is a research domain focusing on the investigation of forensic problems using computational methods. Its primary goal is the discovery and advancement of forensic knowledge involving modeling, computer simulation, and computer-based analysis and recognition in studying and solving forensic problems. The Computational Forensics Workshop series is intended as a forum for researchers and practitioners in all areas of computational and forensic sciences. This forum discusses current challenges in computer-assisted forensics and presents recent progress and advances. IWCF addresses a broad spectrum of forensic disciplines from criminal investigation. The NAS report Strengthening Forensic Science in the United States: A Path Forward, published in 2009, already concluded that: With the exception of nuclear DNA analysis, no forensic method has been rigorously shown to have the capacity to consistently and with a high degree of certainty demonstrate a connection between evidence and specific individual or source. Computational methods can assist with statistical methods using, for example, likelihood ratios to strengthen the different fields of forensic science. The organization of such an event is not possible without the effort and the enthusiasm of everyone involved. We thank all the members of the Program Committee for the timely reviewing process and the adherence to high standards. June 2009 Zeno J. M. H. Geradts Katrin Y. Franke Cor J.
