To understand the processes of life, the movement of growth must be studied. In the work to be presented this problem may be approached by singling out movement arrested by death and calling the morphology of its expression stages of growth. It is the interpretation of the morphological and histological changes between these so-called stages out of which the student may build a dynamic conception of growth. The first step in such an analysis is the establishment of landmarks or points from which to measure change. It is the purpose of THE JOURNAL OF COMPARATIVE NEUROLOGY, VOL. 34, NO. 1 this paper to establish landmarks in the growth and differentiation of the telencephalon, such that accurate measurements of the varied components of the developing cerebral hemispheres may be taken. . Such a purpose is the...
