## Studies from the Dept. of Pediatrics Volume 4

By Washington University Medicine

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1922 Excerpt: .in 58.5 per cent. It is suggested that this high proportion of nonimmunes may be related to the fact that most of the individuals in the group were reared in smaller communities where contact with diphtheria is less than in cities. During a four years period all nurses with positive Schick reactions were given injections of toxin-antitoxin, and as a result more than 80 per cent, were immunized. In a small number the Schick reaction remained positive after two series of toxin-antitoxin injections. As a result of the immunization, there was a decrease in the incidence of clinical diphtheria among these nurses of at least 90 per cents as compared to a previous three years period. It is relatively easy to protect an entire nursing staff from contracting diphtheria by the use of the Schick test and toxin-antitoxin injections, and this procedure should be carried out...
