Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Quantitative Chemical Analysis: Adapted for Use in the Laboratories of Colleges and Schools The experience derived from many years laboratory teaching has led us to consider, that the course of Quantitative Analysis, hereafter described, will be useful to chemical teachers and students, and to others. It will be seen that the course ordinarily adopted has not been modified to any considerable extent, but an attempt has been made to introduce recent methods and apparatus. It has also been our endeavour to render the descriptions of methods and processes as intelligible as possible. We have, accordingly, carefully introduced all necessary practical details, and have illustrated the text by numerous original engravings. The book has at the same time been kept within moderate dimensions by omitting unnecessary theoretical matter; and by inserting only typical, useful, and well-accredited methods, instead of attempting to describe all the different processes in use. The analytical processes described in the text have been repeatedly carried out by our students in the University College, Nottingham, who have supplied the results of analyses which are inserted. We have freely used the standard treatises, monographs, and original memoirs on the subjects treated of: and have recommended the student to refer to these sources of information, when necessary, for further details. A list of the more important works of reference will be found on pages xxi, xxii. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy....
